### Content:

This project of the CCBE is financed by the Commission in order to create a search portal of lawyers for the citizens and is destined to be integrated into the European e-justice portal. 13 bar associations have joined the pilot project.

### Concept:

Search functions through name, country, title, languages, subject; if applicable also through city, zip code etc. If applicable, contact data incl. website and e-mail address will be provided. The chambers will take care of the update, which means lawyers who aren't allowed to practise anymore will be automatically deleted from the platform when deleted from the chamber register. Even though it is aimed at the citizen, it can also be a useful portal for lawyers, in order to find contact information.

## 5. Lawyer-search by citizens: project “Find a lawyer”

“Find a lawyer” will be available in all EU-languages

### Effective:
